### **DETAILED ACTION**

- This action is responsive to the following communication: Notice of Appeal filed on 11/20/06 and authorized Examiner's Amendment dated 1/3/07.

#### ***Allowable Subject Matter***

- Claims 1-35 are allowed.
- The following is an examiner's statement of reasons for allowance: The cited prior arts (US 6335978 to Mascato et al and US 6680783 et al) of record teach a printing system and its methods for verifying printed documents, but fail to teach and/or suggest a prohibition of additional printed version from being produced from another print request if said output is signified to be a successful print and in combinations of other features as cited in independent claims 1, 21, and 35. The examiner found neither prior art cited in its entirety, nor based on the prior art, nor found any motivation to combine any of prior arts that teaches the above limitations and in combinations of other features as cited in claims 1, 21, and 35.

#### ***Conclusion***

### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Charles Griggers on Jan. 3, 2007.

**Amend the following claim:**

35. (Currently Amended) A method for verifying a document including the steps of:

providing a first electronic image of a document;

providing a second electronic image of a document, said second electronic image

being a scanned copy of a printed version of said first electronic image; and

comparing said first and second electronic images and providing an output in response thereto

wherein said output signifies whether said printed version of said first electronic images is a

successful print and causes a prohibition of additional printed versions from being produced

from another print request if said output is signified to be a successful print.
